Banner

Custom size

Resize the artboard size according to the desired size of the final product.

Do not place graphics closer than 8 cm from the edges. Graphics that are placed closer than 8 cm from the edge may end up in the finishing of the printed product.

Make sure the document color mode is set to CMYK and use CMYK-profile Fogra 39. **Make your design in the Artwork layer.** Be sure to cover the entire surface of the document with colored backgrounds and/or images with bleed.

Graphics	Use vector graphics to get a sharp result.
Colors	Preferably use Pantone Solid Coated otherwise use CMYK values.
Images	Effective resolution of at least 80 ppi, saved with CMYK-profile.
Text	Convert text to paths i.e. create outlines.

When you are happy with the design, save the document as a print-ready PDF. See the document **How to create a print-ready PDF** (Skapa printfärdig PDF).
